

AUTOMOTIVE

With its central location in the rapidly expanding Southern automotive corridor, Georgia offers automotive manufacturers accessibility and convenience in production and transportation. Georgia is home to more than 385 auto and vehicle related companies. It is this well-situated location that makes Macon-Bibb County an ideal location for automotive suppliers.

These companies, representing all stages of the supply chain, make use of innovative new technologies via eight research universities, and efficiently ship goods around the world via an integrated logistics network.
